DETAILED ACTION

Claim Rejections - 35 USC § 102/103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1713

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Wiest et al. (USPN 4,322,516) and under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Murray et al. (USPN 6,197,878).

In col. 1, lines 29-65 and col. 5, lines 50-52, Wiest et al. teach polymers prepared by polymerizing ethylenically unsaturated monomers in the presence of mixtures of nonionic and anionic surfactants, wherein the nonionic surfactant include 5 to 50 degree ethoxylated straight or branched alkanols having 6 to 22 carbons (col. 5, lines 43-46) and the anionic surfactant are exemplified by alkyl sulfates such as sodium lauryl polyethylene glycol ether sulfate with 3 moles of ethylene oxide (see example 6), said preparations not requiring any alkyl phenol ethoxylate.

In col. 9, lines 54-67 and col. 10, lines 7-49, Murray et al. teach an emulsion prepared by polymerizing ethylenically unsaturated monomers in the presence of mixtures of nonionic and anionic surfactants, wherein the nonionic surfactant include ethoxylated secondary alkanols having 6 to 22 carbons exemplified by Tergitol 15-S-40 (see example 19)m and the anionic surfactant are exemplified by Disponil FES 77 (see exemplified 4 and 15), said emulsion not requiring any alkyl phenol ethoxylate.

While Wiest et al. or Murray et al. may not expressly teach the claimed properties of the claimed binder polymer, it is reasonable that the polymers of Wiest et al. or Murray et al. would possess the presently claimed properties since the composition of Wiest et al. or Murray et al., based on the description, are essentially the same as the claimed composition and the USPTO does not have at its disposal the tools or facilities

deemed necessary to make physical determinations of the sort. In any event, an otherwise old composition is not patentable regardless of any new or unexpected properties. In re Fitzgerald et al , 619 F.2d 67, 205 USPQ 594 (CCPA 1980). See MPEP § 2112 - § 2112.02.

Even if assuming that the prior art references do not meet the requirements of 35 U.S.C. 102, it would still have been obvious to one of ordinary skill in the art, at the time the invention was made, to arrive at the same inventive composition because the disclosure of the inventive subject matter appears within the generic disclosure of the prior art.
